SOLAR AND WIND ENERGY

Renewable Energy for Clean World

A hand holding a globe with people icons. The globe is a map of the world, and numerous small white human figures are scattered across its surface. The hand is positioned at the bottom, supporting the globe. The background is a dark blue gradient.

ABOUT US

CARB International Contracting Est. for Solar and Wind Energy, is a service company in the photovoltaic power generation sector. CARB serves solar power plant power plant investment and technical consulting, projecting, system design, power plant installations, licensing and operation, designing, financing, implementation and general maintenance matters. Apart from industrial installations, we also offer solution for domestic and home roofing solar panel systems installation.

Services include: On-Grid Systems, Off-Grid Systems, Solar Energy Irrigation Systems, LED Lighting Systems, Solar Energy Camera Systems, Electric Vehicle Charging Stations and Turnkey Projects are also available.

In the light of our experience and knowledge; we aim to create added value in the fields of economy, environment, social and politics with a clean, environment friendly and quality energy source.

Our mission is a conception that does not compromise on quality and customer satisfaction.

OUR MISSION

To spread the use of solar energy and support the future of human beings with new technologies by contributing to the world economy and leaving a livable nature for future generations by pioneering to meet the energy need of the planet we live in with clean resources.

OUR VISION

We dedicate our existence to maintain its presence for a long time as an honest, trustworthy, principled organization.

SERVICES

We offer solar panels at high quality standard, inverters, infrastructure materials and provide all the necessary products to your service.

You will experience the difference of producing more energy and having durable products with us.
